Teacher Operations Manual

Welcome to the Teacher Workstation. This interface has been designed to minimize administrative overhead, allowing you to focus entirely on pedagogy and student development.

Chewe Technologies (pvt) LTD

1. Academic Grading

The Academic tab allows you to rapidly input and evaluate student performance.

- **Class Selection:** Use the top dropdowns to select your assigned stream and subject.
- **Data Entry:** Enter the raw score (out of 100) for each student.
- **Automatic Calculation:** The moment you enter a grade, the system automatically calculates the Class Mean and computes individual Z-Scores to show you exactly where a student sits on the bell curve.

Using the AI Comment Assistant

Writing personalized report card comments for hundreds of students is a thing of the past. The Chewe System utilizes a state-of-the-art AI engine to write them for you.

- 1. Click on any student row in your grading table to open their Profile Modal.
- 2. The system will calculate their deficit from an 'A' grade.
- 3. Click the **"Generate AI Insight"** button (or "Regenerate" if you want a different phrasing).
- 4. The system securely consults the AI and generates a highly personalized, context-aware paragraph regarding the student's performance.
- 5. You can manually edit the text before saving it to their official record.

2. Daily Roll-Call & Attendance

Attendance data feeds directly into the Executive Analytics Engine to identify truancy risks.

- 1. Switch from the 'Academics' tab to the **'Attendance'** tab.
- 2. You will see a list of all students currently enrolled in your class.
- 3. Toggle their status between Present, Absent, or Late.
- 4. Hit **Submit Register**. This instantly locks the data into the PostgreSQL database, making it available to the Executive board in real-time.
